DETAILED ACTION

Information Disclosure Statement

The Information Disclosure Statement filed 18 April 2006 has been made of record.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Daniel R. McClure on 30 May 2007.

The application has been amended as follows: As to claim 1, line 10, -- electronic device -- (of "for a *second electronic* device corresponding to") is deleted and -- identity -- is inserted. This amendment resolves a lack of antecedent basis for "the second identity" found on line 29 of claim 1.

Allowable Subject Matter

Claims 1-18 are allowed. The following is a statement of reasons for the indication of allowable subject matter: As to claims 1, 10 and 15, the prior art made of record teaches a method for communication connection in a wireless network

Art Unit: 2618

comprising a plurality of wireless bridges individually associated with at least one electronic device but does not teach the *first wireless bridge attaching a first tunnel header to a first data packet from a first electronic device to form a first wireless data packet and transmitting the first wireless data packet via the wireless network, the first tunnel header comprising a third identity corresponding to the first wireless bridge and a second wireless bridge receiving the first wireless data packet via the wireless network and removing the first tunnel header therefrom to acquire a second data packet and storing an association relationship between the first electronic device and the first wireless bridge.*

Conclusion

The prior art made of record and not relied upon but considered pertinent to applicant's disclosure includes: Abhishek et al. (2004/0185845), Beach et al. (US 2004/0192227), Brownrigg et al. (US 6,044,062), Perlman (US 2004/0160986), Bryson (US 2004/0185777) and Trompower (US 6,132,306).
